

# Innovative Valve Design

**Electrolyte Level Indicator Eye**  
Visible from the top and side

**Solid One Piece Float**  
Acid, temperature and impact resistant; solid construction cannot absorb water

**Clip-in Base**  
Installation is fast and easy with no twisting to lock in place

## Safe

The spark arrestor makes this the safest watering system available.

## Flexible

Works on every FLA battery we carry and on every configuration.

## Easy to Use

Water flows through a single connection reducing labor cost by accurately filling each battery set in less than 30 seconds!

## Easy to Use

Innovative clip-in valve makes installation of pre-strung systems fast and easy.

## ...Water With Confidence

[WWW.USBATTERY.COM](http://WWW.USBATTERY.COM)

# Installation is Easy!

Remove existing vent caps from battery.

Line up the valves over openings.

Push valves firmly into openings.

# Intelligent Watering Solution

A watering system so intelligent, it has solutions to problems you didn't even know you had!

**Battery Watering Technologies** watering valves add the correct amount of water every time.

Proper battery maintenance can add years to the life of a battery.

# Water Delivery Options

**Water Delivery Gun** Features a built-in flow indicator and pressure regulator. It connects directly to a water source.

**Gravity Fill System** is ideal for filling a small number of batteries when a water source is not readily available. The 2.5 gallon gravity fill tank should be placed at least three feet above the battery tops to ensure sufficient water flow.
